Every sign indicates that within thirty days Cleveland's Cuban policy will be completely reversed by President McKinley. The Spanish minister here has already reported to his government that Consul General Lee will be backed up to the fullest extent and that unless Cuba is to be lost forever American citizens must be protected at all hazards. It is known that Spanish emissaries bave, for months, endeavored to commit Major McKinley to a policy of absolute non-intervention and failed completely. Secretary Sherman believes in recognizing Cubans as beligerants. President McKinley is naturally anxious to have congress get to work on the tariff bill and he can best accomplish that by granting beligerant rights to the Cuban

THE figures from the nineteenth ab stract of the Bureau of Statistics, which has just come from the government printer, show that in 1867 the per capita of money in stock to have been \$20.11; in 1896 it was \$32.86. The per capita of noney in circulation in 1867 was \$18.28, one half of it valued in gold at 72c on the dollar; in 1896 the per capita circulating was \$21.10, all valued at par in gold. The per capita of the national debt in 1867 was \$69.26; the year 1896 saw it reduced to \$13.41. Between the same years the per capita of interest on the debt declined from \$3.84 to 49c, and the annual national tax on each citizen from \$9.87 to \$4.94. These changes for the better are so striking that no dis gruntled citizen will venture to mention the subject of per capita unless he is thoroughly misinformed about it.

eached its climax of freak legislation in trying to attach an enactment clause to the ten commandments? Every state legislature seems to contain enough ranks to keep the ball rolling, and every day brings forward new evidences of legislative asininity. Kansas is no worse than other states in this respect. Bills simed against theater hats, cigarettes and football have literally become "too numerous to mention." A Massachu setts solon asks for a salaried state board to examine blacksmiths; North Dakota proposes to license barbers;an In diana man has a project to tax whiskers; Massachusetts also wants all chiropodists to pass a state examination; Michigan and Missouri propose to tax bachelors, and a Missouri legislator has also introduced a bill to punish by heavy fine any widow or unmarried woman who refuses an honorable offer of marriage. Minnesota comes forward with a bill to prevent women from sending flowers to riminals. Missouri wants to fine railway hands \$25 for flirting with women passengers, and Nebraska asks that all bulls' horns shall be removed when the animals become 2 years old. Michigan and Indiana demand that bills of fare shall be printed in English only, and a measure was recently introduced in the Indiana legislature making it a misde meanor to wear squeaking boots to church. Oklahoma has tried legislation against bloomers. Kansas against cor sets, and Alabama against shirt waists This country may or may not be "the home of the brace," but it certainly is fast becoming the land of the freak.

What use is there in eating when food does you no good-in fact, when it does you more harm than good, for suc is the case if it is not digested?

If you have a loathing for food ther is no use of forcing it down, for it will not be digested. You must restore the digestive organs to their natural strength and cause the food to be digested, when an appetite will come, and with it a reish for food.

The tired, languid feeling will give place to vigor and energy; then you will put flesh on your bones and become strong. The Shaker Digestive Cordial as made by the Mount Lebanon Shakers contains food already digested and is a digester of foods as well. Its action a prompt and its effects permanent.

Cheap Horses In 1884 the average prices of the horsee in the United States began to decline. In the 12 years since that time there has been no recovery. On the contrary the decline, which was slow and comparatively small in the later sighties, accelerated its pace in 1890, and in 1893 and 1894 was very rapid. In

1895 it was not so swift, nor in 1896. The checking of the rate of decline in price has been brought about by a deeided decline in the number. The number of horses in the United States is less han in 1892 by about 11 per cent.

The government agricultural department, discussing the subject in the atest bulletin, advances the opinion that the chief cause of the depreciation of horses is not the bicycle and the electric motor, thought it concedes that these have lessened the demand for livery horses, and well-nigh have destroyed the demand for street car horses. The department attributes the decline a price chiefly to over production on the great grazing ranches of the west and northwest, during the eighties. It predicts that with lessened production and with a betterment of breed and condition, the depreciation will cease, and and appreciation will begin.

At the present horses average in price,

At the present horses aver ge in price, for 3 year-olds and over, from \$60, to \$80 in New England, \$25 to \$40 in the south and southwest, \$40 to \$55 in the Ohio Valley, and \$20 to 35 in the west sud northwest. The lowest averige price

Very few thieves escape punishment and enjoy the possession of their ill gotten game. It is the rule that they either suffer the penalty of prison or else end a long period of expatriation by death in poverty and shame. At Osborne City, Kas., the other day a young man who had been exiled for four een years came back to the deathbed of his father. As he stepped from the train the sheriff was awaiting him and he now lies in jail awaiting frial for the crime committed so long ago. He had been assistant agent for the railroad company, and one night he purloined \$300 from the station agent's safe and fled the country. He told the sheriff that he came back because he thought the crime had been

grief. He could not come to her. He

was an outcast, an Ishmael, and she sobbed her life away. Letters which came to his daughter showed that he was fleeing from one country to another, driven by remorse and fancied detectives. At last came a letter which caused the filing of the petition which we have mentioned. It brought the information that he was in poverty and sickness and craved the boon of coming home to die. The governor is not a sentimentalist. He said Tate might come bone to jail.
